Degree	Community Rehabilitation and Disability Studies (BCR)	Disability Studies (BA)	Disability Studies (BA Honours)	Major in Disability Studies	Disability Studies (BA)
Mission	Community Rehabilitation and Disability Studies examines the economic, social and political forces that serve to marginalize people.	The focus of the program is the critical analysis of disability in society which includes the study of disability as a social, scientific, cultural, historical, and political construction.	Disabilities Studies provides students with the knowledge and experience-based practice they can use to advocate for: Social justice, Anti-oppressive needs, and Accessibility for people with disabilities.	Disability Studies (DS) creates the space for rethinking traditional, medical approaches, to imagining disability, mental health and related social institutions, using a liberal arts lens to explore the variety of possible, yet uncommonly shared, meanings.	Disability Studies explores the ways in which the lives of people with disabilities are shaped by patterns of injustice, exclusion and discrimination and social, cultural and aesthetic “norms.”

Degree	Master of Disability and Community Studies (MDCS)	Interdisciplinary Master's Program in Disability Studies (MA or MSc)	Master of Arts in Applied Disability Studies (MA)	Master of Applied Disability Studies (MADS)	Critical Disability Studies (MA)
Mission	Fostering leadership and innovation that improves the lives of people with disabilities is a key aim of the Disability and Community Studies program. It is designed for professionals from several disciplines and professions who have a minimum of three years of accumulated work/life/volunteer experience with disability, chronic illness, and other marginalized conditions.	The Interdisciplinary Master's Programme in Disability Studies examines the social, rather than the physical or psychological determinants, of people's experience of disability.	The MA option, with its advanced course work and strong research focus, is intended to prepare students to continue their graduate training at the Ph.D. level. It should be noted that foundational and theoretical work are embedded in applied courses and practicum experiences. Students will be prepared to pursue the wide variety of career possibilities in disability studies and applied behaviour analysis.	The Mission of the Department of Applied Disability Studies is to educate students who will be agents of change to help better the lives of people in our community and beyond with a focus on persons with disabilities and underserved populations, We strive to contribute knowledge and improve services by conducting cutting edge basic and applied research, and by providing transdisciplinary, quality postgraduate education to the next generation of professionals, researchers and educators, and experienced professionals in the field.	The MA (Critical Disability Studies) explores disability studies from a critical perspective. It is unique in that it contributes to emerging research examining the systemic social, political, legal and economic barriers to the full societal inclusion of persons with disabilities.

Doctoral programs:

	University of Calgary	York University
Website	https://grad.ucalgary.ca/future-students/explore-programs/community-health-sciences-phd	https://cgs.gradstudies.yorku.ca/programs/phd/
Degree	PhD in Community Health Sciences with option to specialize in Community Rehabilitation and Disability Studies	PhD in Critical Disability Studies
Mission	Community Rehabilitation & Disability Studies (CRDS) examines the intersection between community, disability, mental health, chronic illness, and other marginalizing conditions within a social justice framework. The goal is to generate and influence critical research theory, leadership, capacity, innovation and partnerships that bridge gaps between, knowledge, policy and practice. Our graduate programs attract professionals across disciplines and sectors, as well as students pursuing an academic career.	The program structure and environment encourages advanced research, new scholarship and other opportunities to contribute to the field, enabling a multi-disciplinary group of students to explore disability from a critical perspective in relation to social policy, social justice, human rights issues, and social movements in Canada and internationally.
